5.2)

Yes: no duplicate Student-ID

No: As Student-ID is a PK, there can't be duplicate values
No: No student ID provided, unique keys are required

5.8)

The right to delete should be revoked from Y.

When Y got the rights to delete it was given by X through B and only B so when the revoke cascade takes effect, even though C technically gives Y the right to delete, because X gave Y the right to delete from B before C, when B revokes its rights to X, Y also has its delete rights revoked. Y's right to read and insert remain intact at A gave those rights before B so therefor Y can retain those rights.
